

# -8- proposals

# for the 8<sup>th</sup> PCRD the european program

- in addition to the CCS adopted program We need an european R&D program for CO2 valorisation :
- energy storage such as **Methane ,methanol ,synfuel with new catalysis processes and new industrial plants**
- and **new biodegradable chemical compounds**
- ***So carbon dioxide storage will be a carbon resource for the future of our civilization***

# The challenge

- Energy and carbon cycle

The freedom of our

EEC society

Thank you so much for your attention
